ARCHICAD

 **TEKLA**

Rambøll principles why we use IFC

- **The best tool for the job**
 - Optimal work process
- **Different design partners**
 - Attract projects/clients
- **Use of IFC**
 - Allow for flexibility
- **Close dialog with vendors**
 - Reliable IFC quality

IFC Test

- Swedish IFC Workshop, 2008. 09, Stockholm
Participants: AC, Revit, ADT, Allplan, VectorWorks, MicroStation and Tekla
Result:
- IFC Validation by buildingSMART Korea

Revit Structure 2009 - IFC Export				ArchiCAD 12 - IFC Export		
Command in RevitS	Element Name in RevitS	Exported IFC Name	Import to ArchiCAD	Command in ArchiCAD	Exported IFC Name	Import to RevitS

				Beam/ Inclined	IFCBeam	Structural Framing
				Column/ Slanted	IFCColumn	Column (Hidden)

Legend:

	OK!
	The elements are hidden after the import to RevitS. Show hidden elements in RevitS *
	It needs some modification in view settings and element properties in RevitS or ArchiCAD **
	Good appearance, but additional unlinked components are generated in RevitS import
	The element is not translated into IFC at the RevitS export
	The slanted and custom profiled AC walls are exported to IFC 2x3 with "IfcRevolvedAreaSolid" geometry that is not interpreted properly in RevitS import

It is important to note that some operators will perform better in some environments than others. For example, a person who is very good at working with numbers may not be as good at working with words. Therefore, it is important to choose the operator that is best for the task at hand. In this case, the task is to find the maximum value in a list of numbers, so the operator that is best for this task is the `max` operator.

Abstract: Psychological distress (PT) is the emotional distress to the individual and is usually a complex phenomenon. Four variables, the emotional state, the physical state, the cognitive state, and the behavioral state, are the four main components of PT. The four variables are interrelated and can be used to explain the PT phenomenon. The four variables are also interrelated and can be used to explain the PT phenomenon.

^a The χ^2 statistic indicates that "yes" is the answer to the question about a national standard regarding the method of recruitment and selection in hospitals. It is statistically significant for the χ^2 statistic (see the text) to suggest that even when it is stated in the staffing order.

The authors would like to thank the following individuals for their assistance in carrying out this research: Rebecca W. McArthur, University of Illinois at Chicago; and the research assistants, Jennifer L. Moore, Tami L. Moore, and David L. Moore. The authors also thank the following individuals for their assistance in carrying out this research: Jennifer L. Moore, Tami L. Moore, and David L. Moore.

It is important to understand that not all countries experience economic stagnation or other economic problems. Economic development is not the same for all countries. This is because there are many factors that affect economic development. For example, the level of education, the quality of infrastructure, and the political environment all play a role in determining a country's economic growth. The World Bank's *World Development Indicators* provide a comprehensive overview of economic data for many countries, allowing for comparisons and analysis of economic trends over time.

As the FBI conducts background investigations, investigators cannot always be expected to anticipate or identify an exact match of the FBI's database to those it found in the state's state files. The FBI does not have a way to identify the state files it found in the state's state files.

Agreement Draft Korea, Japan, Singapore, Australia, China(to be confirmed): 2008. 9. 17

1. Membership

- ◆ It is proposed that SG, JP, KR, CN and AU form the buildingSMART Asia regional alliance.

2. Draft Charter

- ◆ The Asian alliance would work together to carry out the following:
- ◆ share information about how each country is working /collaborating with Government agencies
- ◆ share BIM guideline work
- ◆ provide an Asian industry forum, assisting each other at local meetings etc
- ◆ provide a lobbying/networking function
- ◆ provide an Asian IFC technical/certification service
- ◆ identify common objectives/priorities and work together to achieve them (eg sustainability etc)
- ◆ It was noted that all countries had complementary industry organisations that may already have some Asian collaboration for example as the respective Institutes of Architects (SIA, JIA, ?, AIA, ?). It was agreed each member would develop a list of such key organisations (eg product manufacturers, engineers, owners, architects, green building, contractors, facility managers and government (building) agencies) with contact information, so we can develop a plan to lobby these groups in a coordinated way.

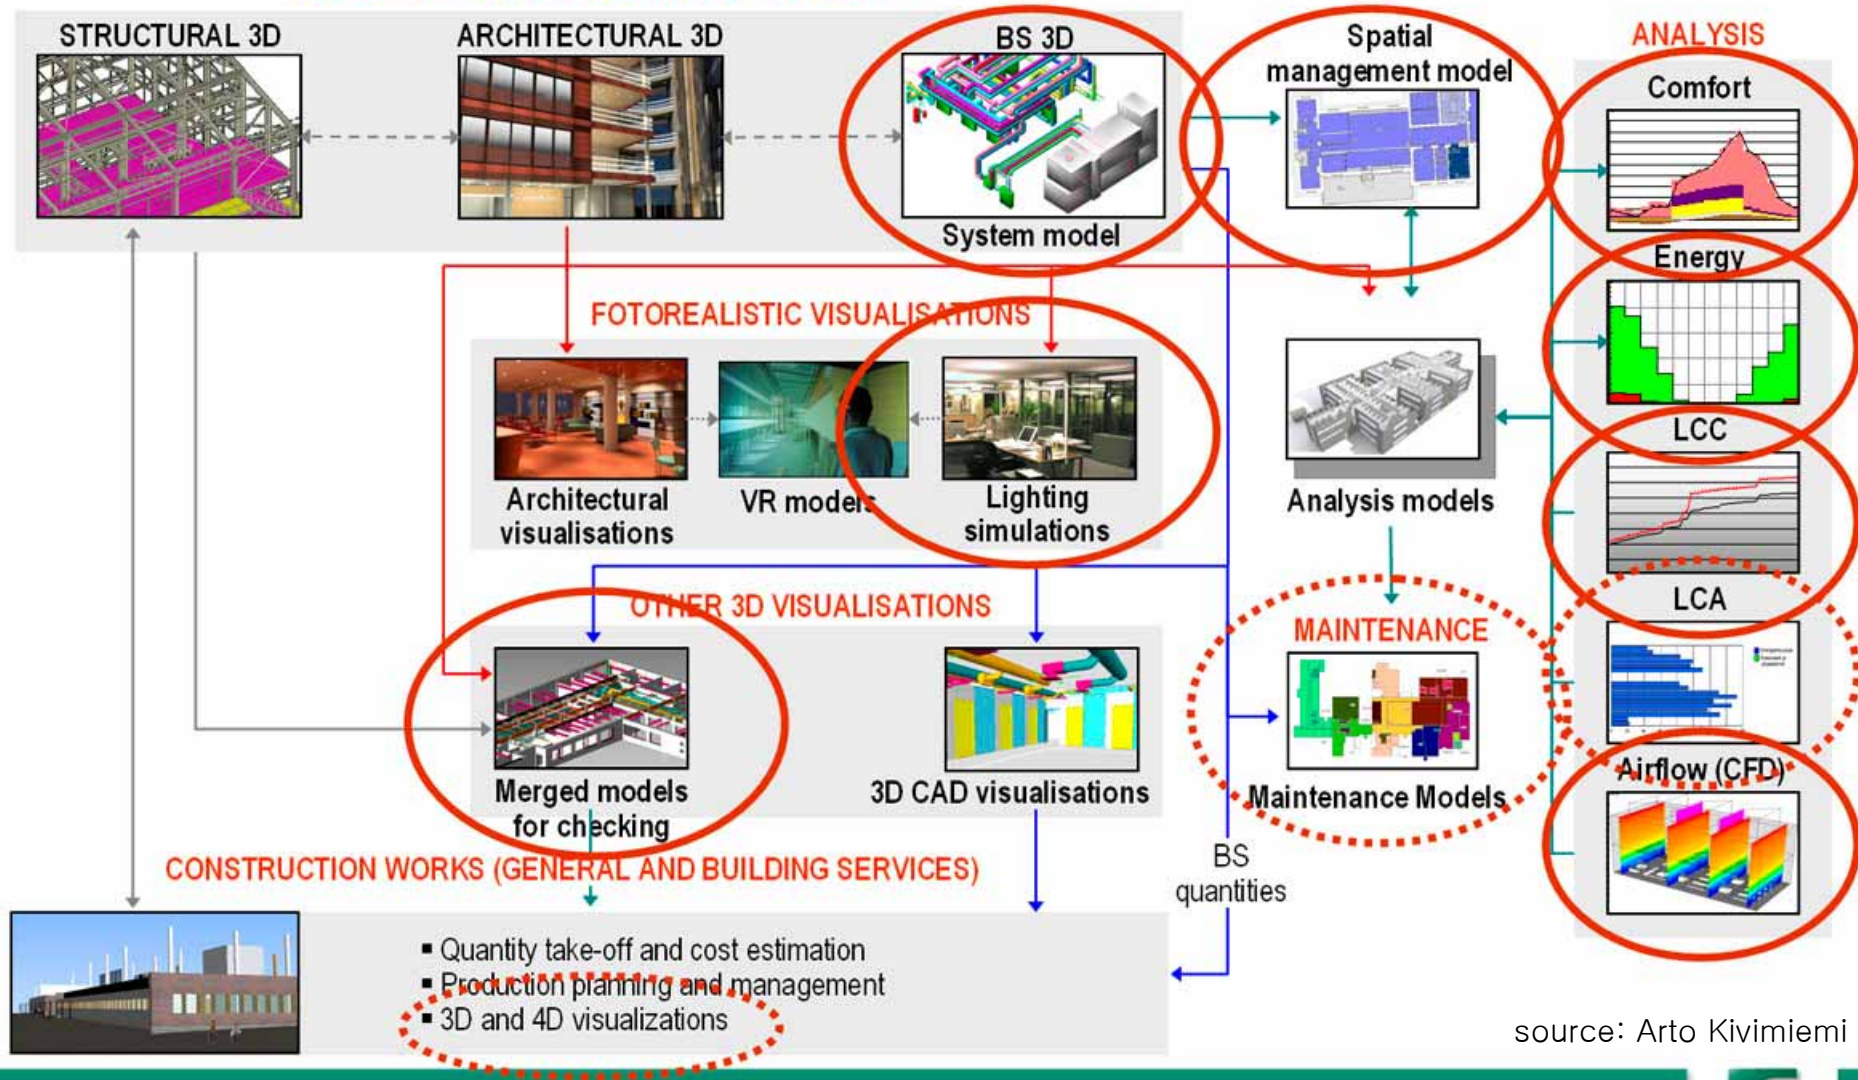

3. buildingSMART Asia Contacts

- ◆ SG William Lau
- ◆ JP Yoshinobu Adachi
- ◆ KR Inhan Kim
- ◆ AU John Mitchell
- ◆ CN Cui Lu (to be confirmed)

BIM ?

Open BIM vs. Closed BIM

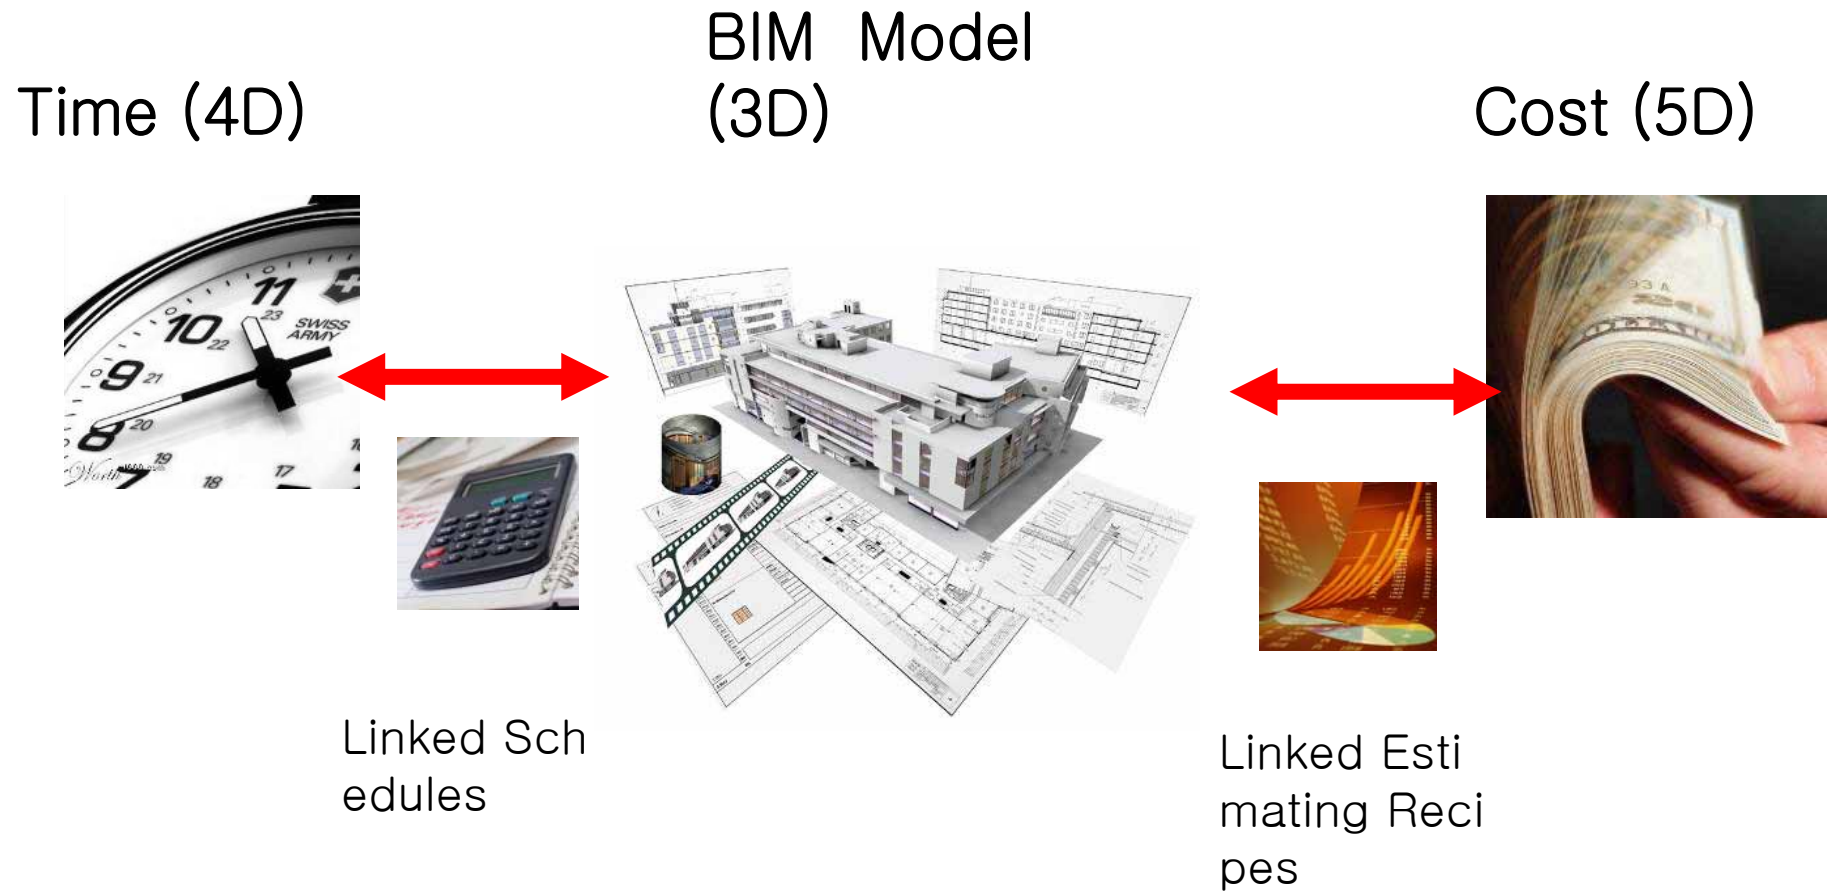

Digital Architecture & Building Lifecycle Information

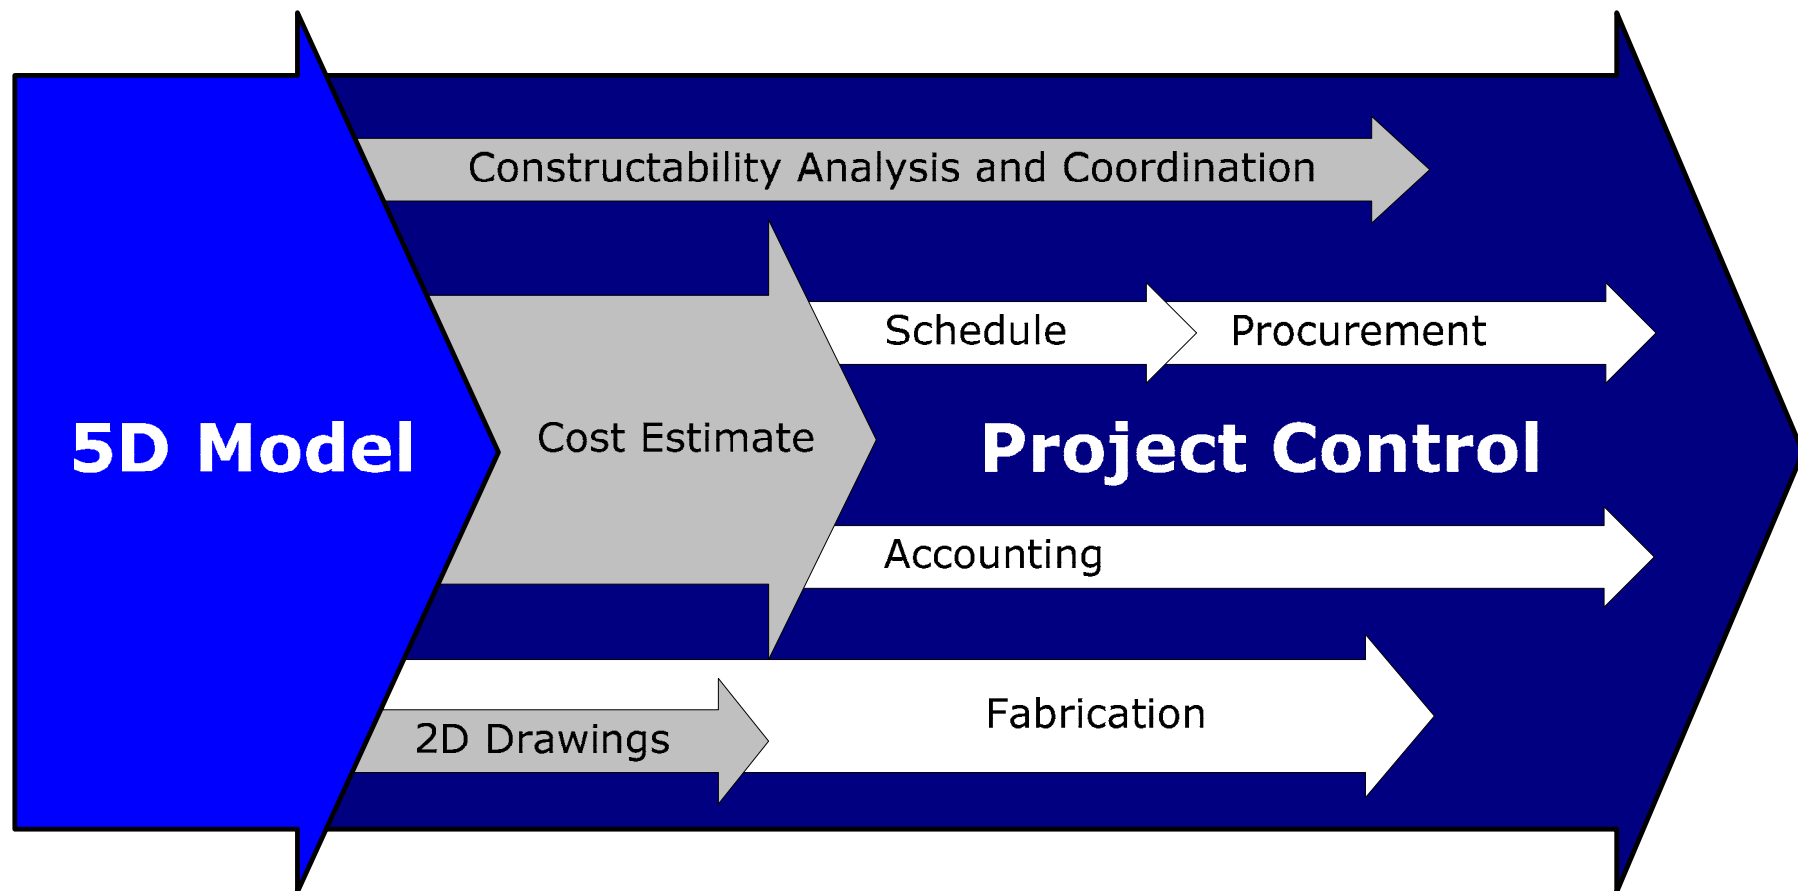

Open BIM

The Virtual Construction Model (5D)

5D Work Flow

Benefits: Clash Detection

- Conventional methods of coordination are extremely time consuming and error-prone.
- Using internal or external clash detection software helps to identify the construction errors in the BIM model
- Construction risks and costs can be reduced significantly

Sustainable Design

Environmental Impact of Buildings

- 40% of global raw materials is consumed by buildings
- 65.2% of total U.S. electricity consumption
- 136 million tons of construction waste in the U.S.

„We must make the rescue of the environment the central organizing principle for civilization.”

U.S. Department of the Interior

Regulations & Market Incentives

- All federal buildings in the U.S. must achieve Silver LEED certification
- From Jan. 2006, EPD came into force across all the EU states
- By 2007, demand for green projects expected to grow by 300%

„Intelligent use of energy must be regarded as a fundamental element in formulating the energy objectives of the European Union.”

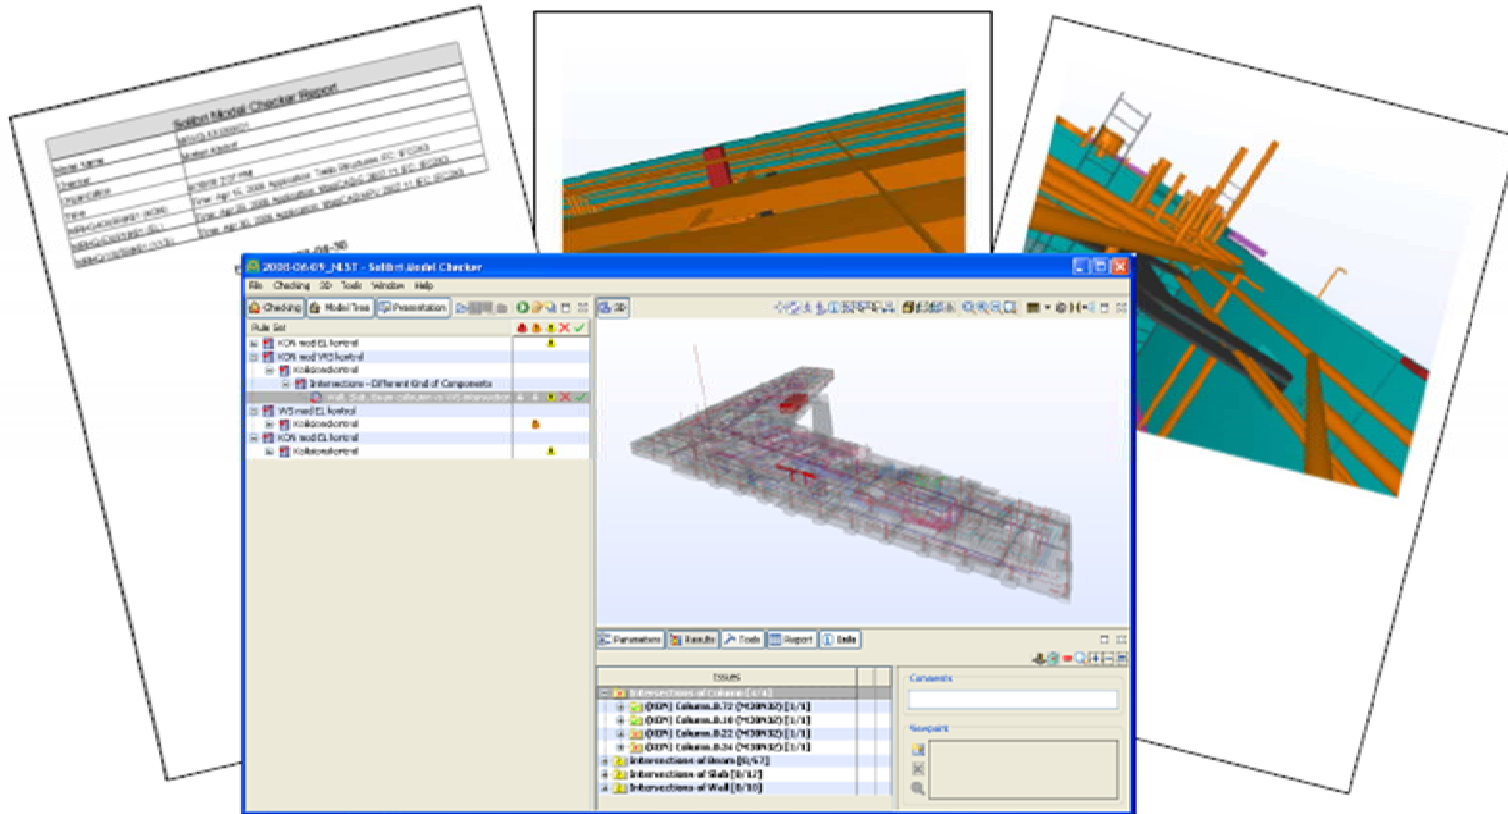

Bendt Bendtsen, EU–Presidency, Minister for Economic and Business Affairs, DK

buildingSMART Aquarium - concept at a glance

- The **key roles** are driving the process
- **R - Problem owner:**
 - Pays for facilitation
 - User scenarios
 - Domain expertise
- **R - buildingSMART:**
 - buildingSMART standards
 - Problem modelling
 - Implementation guidance
- **R - sw developers**
 - Create solutions
 - Provide user manuals
- Others can join the Aquarium and ...
 - watch or
 - participate
- Narrow scope
- Clear deliverables

Thank you
